MEMORANDUM FOR:

Chief, OCR Main Library

FROM:

SUBJECT: Consolidated Library: DDA and DDS&T

1. Attachment A is a copy of the DDA and DDS&T requirements for the consolidated library in the new building. The total space allocated in the new building for these requirements is 3,000 square feet.

2. The architects still need from us a consolidated list of these requirements. The following questions need to be answered.

- a) How many total linear feet of shelving is needed?
- b) A list of the furniture (i.e. tables, study booths, etc.), along with the dimensions of the furniture.
- c) What equipment is needed?

3. The responses should also include anything that the directorates have left off their lists that OCR feels is necessary for the support of the library. Not knowing the Agency's requirements, the architects have drawn a preliminary sketch of what the library might look like. Attachment B might help you to visualize the shape of the space and the size. Once the architects have the information, they will update this plan to reflect our requirements.

STAT

4.  I am sure, once you have reviewed all the attachments, there will be many questions. Please call me for any assistance the architects and I can help you with in answering the questions.

1. Attached are the Directorate of Administration (DA) Offices' responses which were prepared to assist you in properly planning the space for the New Building Consolidated Library Facility. Planning for the library in the new building affects the Offices within the DA differently. They have responded to their individual requirements as follows:

a. The Offices of Training and Education and Medical Services are not being relocated to the new building, therefore, they do not have new library requirements. The DA Safety Staff has recently been incorporated into OMS as an Office Division and the internal library space previously allocated to the Safety Staff should remain as originally planned. OMS reported via telecon that they had no additional library needs or input other than the Safety Staff requirement indicated above.

b. The Offices of Information Technology, Finance, and Personnel have been allocated their own internal library space in the new building and will not be sharing in the new building consolidated library. However, OF and OP have suggested some reference material and publications to support the new building consolidated library.

c. The Offices of Communications, Information Services, Logistics, and Security will be sharing the consolidated library facility and have provided detailed information to assist in planning for the library space.

2. If you have any further questions regarding DA library requirements, please contact [Redacted] Assistant DA Planning Officer, on extension [Redacted]. To answer any queries on the attached DA Office responses, I suggest you contact the appropriate Office directly to coordinate additional information.

2. The OC Library has a comprehensive collection of diversified technical information to serve the OC staff. Eighty-five percent of all the publications now on file and received in the OC Library can be considered reference material pertinent to the OC staff and should be retained in the New Building Consolidated Library Facility.

3. To avoid duplication of periodicals and books, suggest it may be useful to review the OCR/Library card catalog files and the OCR/AB Master Renewal Listing for Periodicals.

4. The Office of Communications operates an Employee Resource Center. Space, furniture and equipment needs to be considered in the New Building plans. This Center may be incorporated within the New Library space if it is private, or separated from the main stream. However, it is best as a stand alone facility.
